

MXsteerLink – realistic steering feel for driving simulators

VI-grade ZPS Summit 2024 | Udine

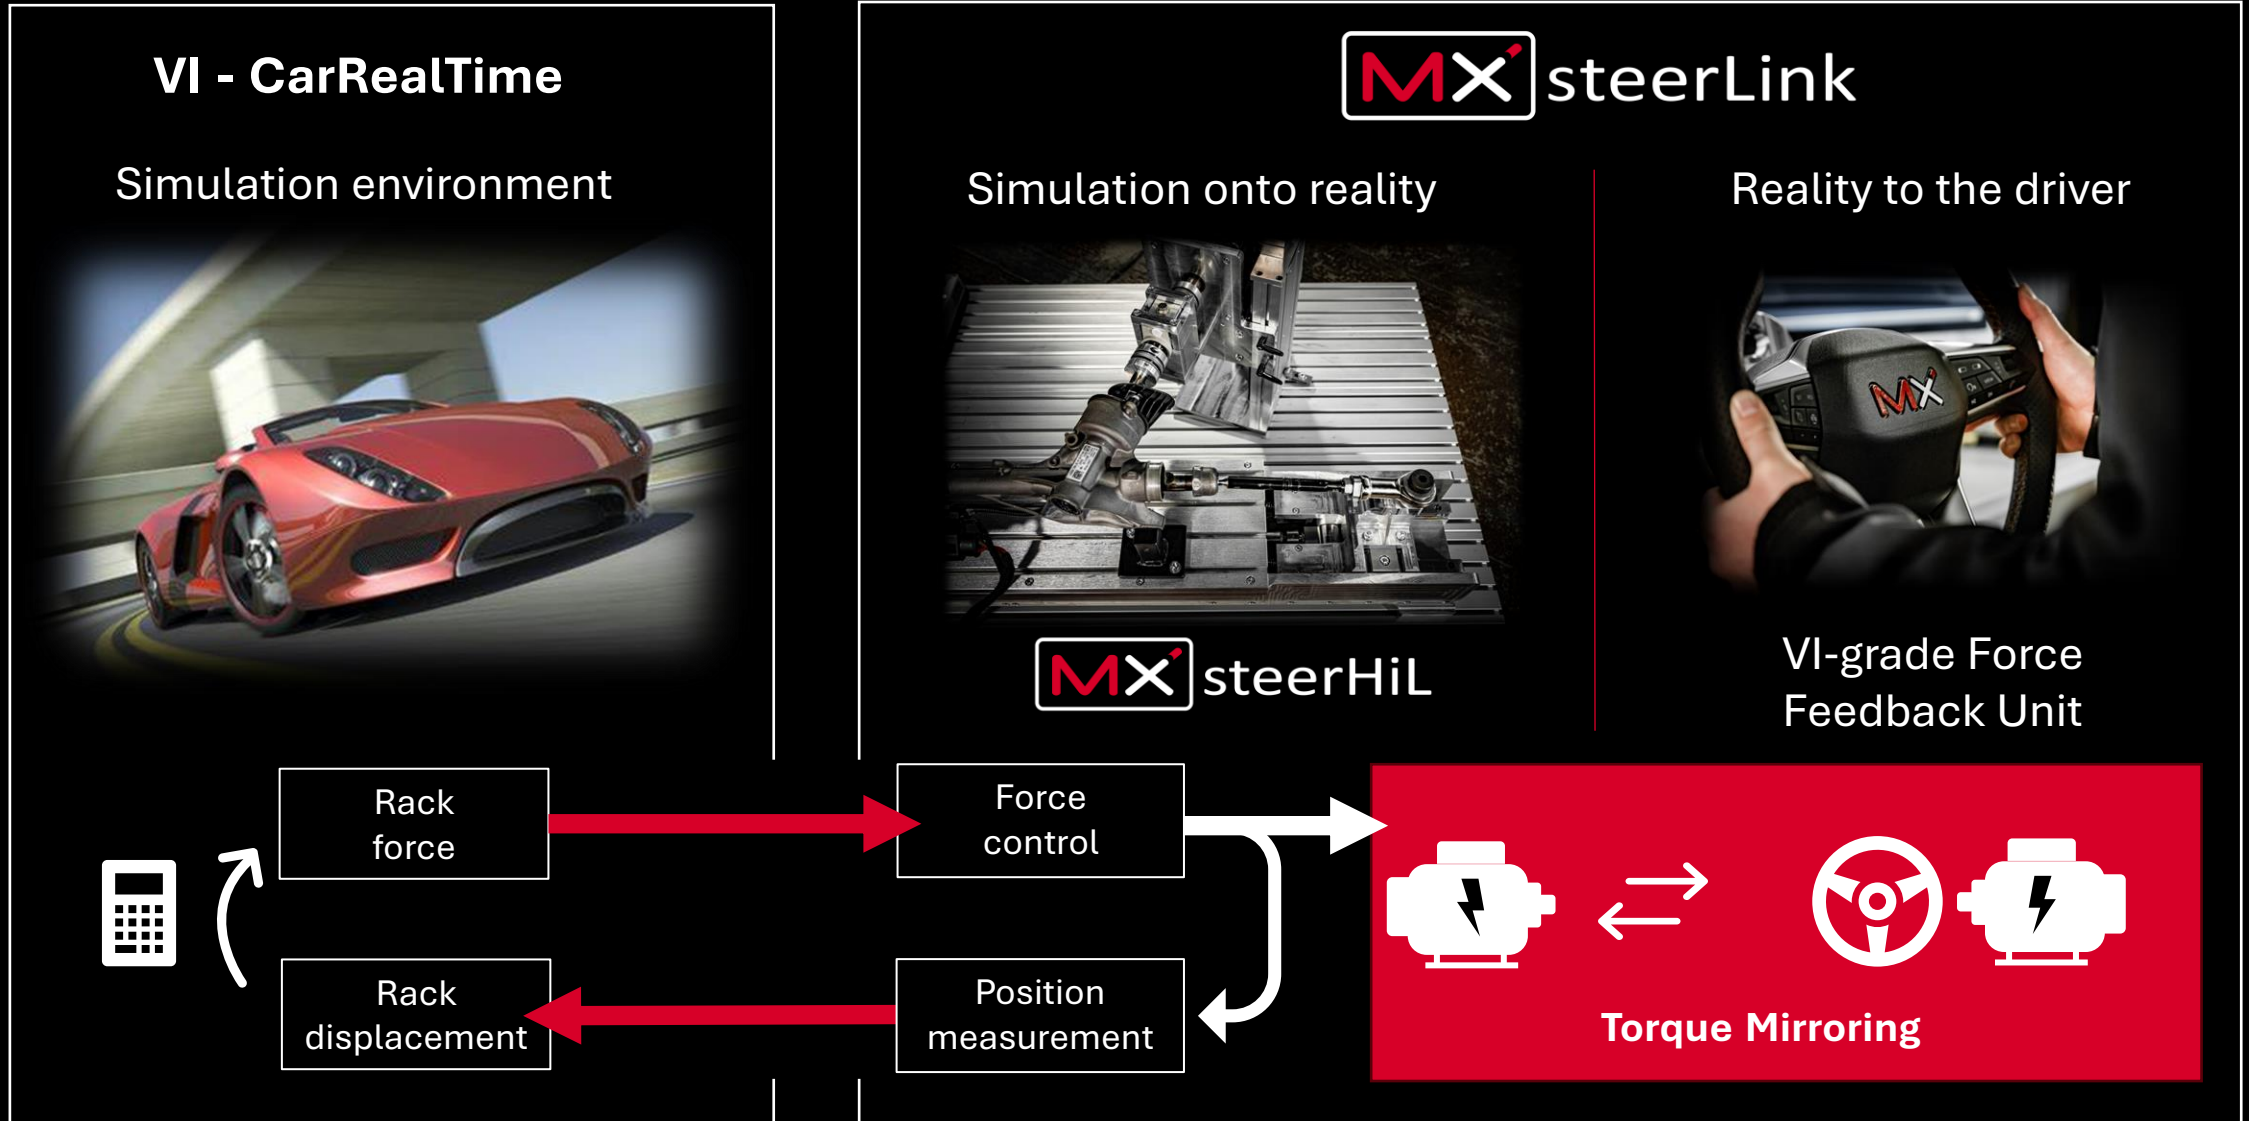

Kilian Joerg | Product Manager Test Bench System | kilian.joerg@mdynamix.de

MXsteerLink – the must add on for DiM-systems

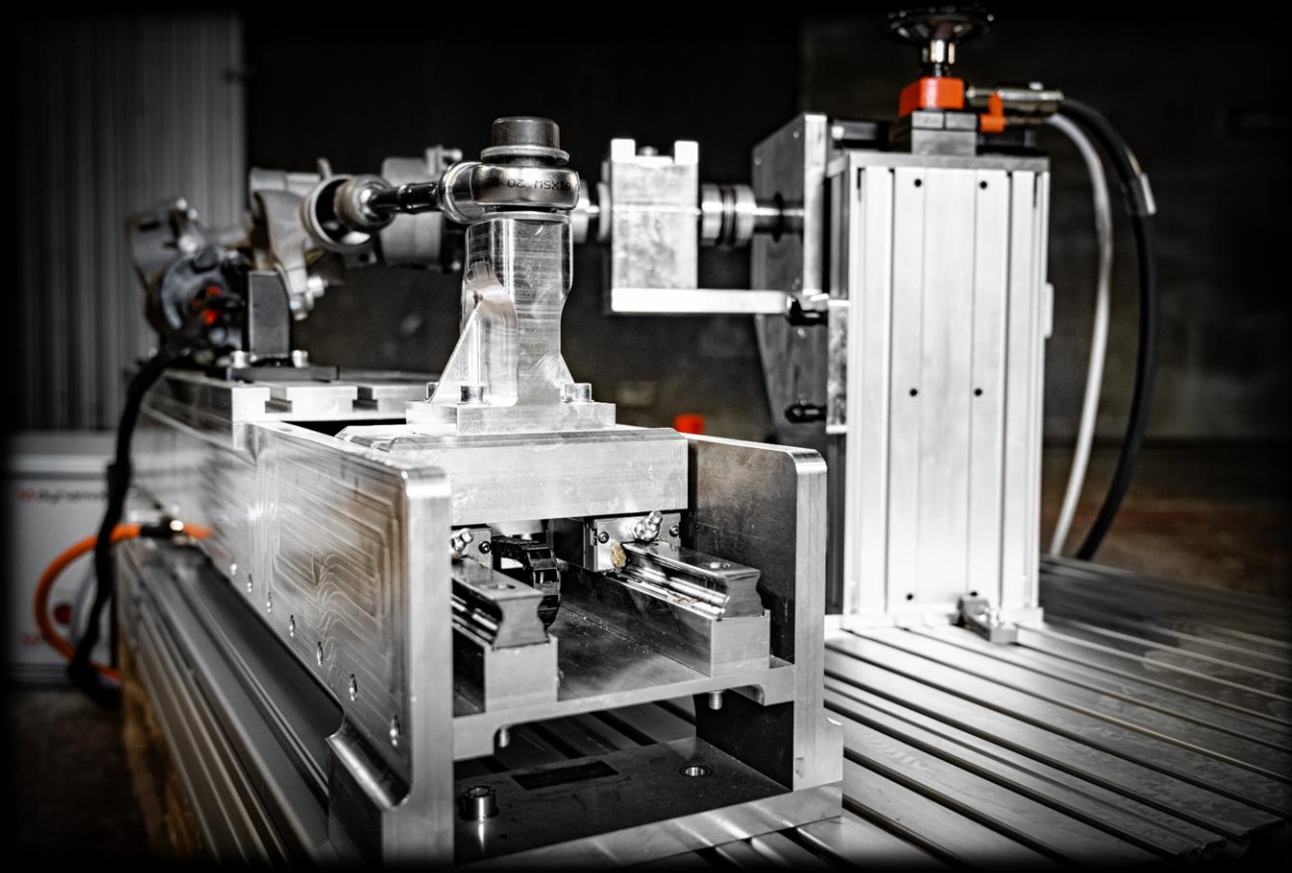

„Feel the reality on the road to zero prototypes“

MXsteerLink – HiL test bench for Driver in the Loop

What can you expect from the MXsteerLink?

Real and authentic steering feel

Small footprint 800 x 1200 mm

Cost efficient solution

Due to usage of existing VI-grade FF unit
→ No additional payload for mockup

Optimization of use cases:

- ADAS function testing
- Steering feel development
- ECU function tuning
- Tire testing
